BRACKETS AND SUPPORTS

At Base, we offer a wide range of bespoke, custom brackets. Below, you'll find some of our most popular bracket solutions. If you have any specific requirements, feel free to contact us.

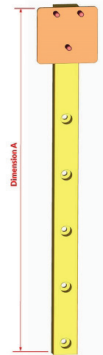

Standard Specification:

Mild steel (stainless steel optional)
Powder-coated to match your awning

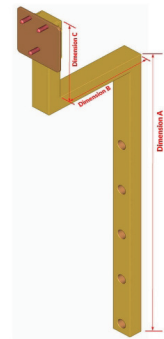

Spreader Bracket (Plate)

Standard fixing for single storey extensions and load-bearing applications. Designed to spread the load away from the top of the wall on a single storey extension.

Gutter Bracket

The Gutter Bracket is designed to be the perfect solution for low installation heights and to overcome obstructions which can arise when fitting awnings to bungalow roof lines or above outward opening doors where additional height is required.

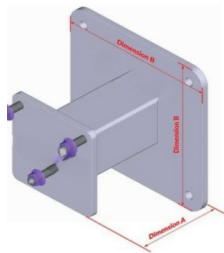

Pipe Bracket

Safe and compact Brackets for installing around wastewater pipes, probably the most common obstruction encountered when installing awnings.

The Waste Pipe Bracket is designed to overcome the installation of awnings in front of downpipes or uneven walls. It can also be used where there are limited fixing points below the awning mounting point, i.e. window/door level.

The critical dimension always to check, is from the back of the wall to the front of the obstruction. We recommend that the projection or as we like to refer to it, doesn't exceed 300mm.

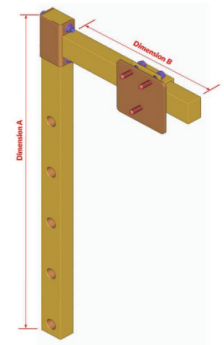

Spreader Sign Bracket

The fixing plate encompasses the signpost & can be moved to the correct position by the use of a grub screw which tightens the plate so ensuring a safe and worry-free installation.

The sign can be utilised on either hand & these are attached to the spreader via 2 x M8 x 80 mm fixings.

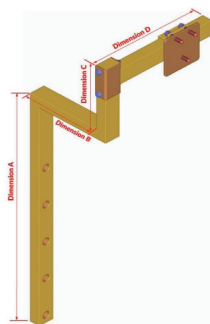

All dimensions are standard 930 legs with 5 fixings, 400 mm signpost.

Spreader Sign Bracket

The Gutter Sign allows a flexible fixing position away from your installation point. It allows the flexibility of installation in reveals and over patio windows. It is supplied with a movable clamp which you can lock into position so obtaining the correct fixing position as preferred by manufacturers.

When you cannot get near the fixing position wanted 'Gutter Signs' are often the solution to the perfect fix and giving you flexibility, like the gutter bracket the gutter sign is designed to be the perfect solution for low installation heights and to overcome obstructions but also offer adjustability in the horizontal direction.

Double Cranked Bracket

Double Cranked Gutter Sign Bracket – 90 Degree Corner Only

This bracket is designed to be the perfect solution for low installation heights and to overcome obstructions which can arise when fitting awnings to bungalow roof lines or above outward opening doors where additional height is required.

- Bracket is supplied with a standard front mounted plate.
- Bracket can only be made from 60x60 or bigger box section.
